Creating a Storyboard

A storyboard is a story told in pictures, like a comic book. A storyboard is helpful when turning a book into a movie because it allows you to see what your scene will look like.

Follow the directions below to create a storyboard for your favorite book.

1. Choose a passage or scene from your favorite book. Choose a passage that includes an action (something that happens) because those make the best movie scenes.
2. Identify and describe the elements of the scene you chose. Include as many details as possible.

A. Characters: _____

B. Setting: _____

C. Conflict: _____

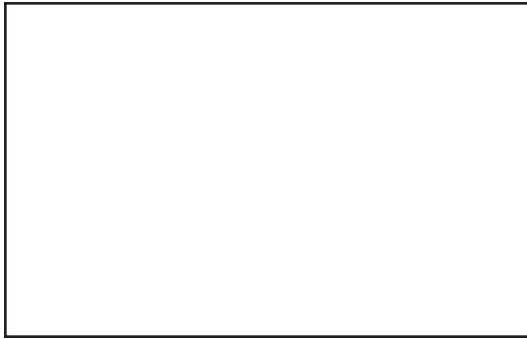

D. Solution: _____

4. Use the boxes on the next page to draw what you want the scene to look like. Underneath each box, a description of what appears in the box.

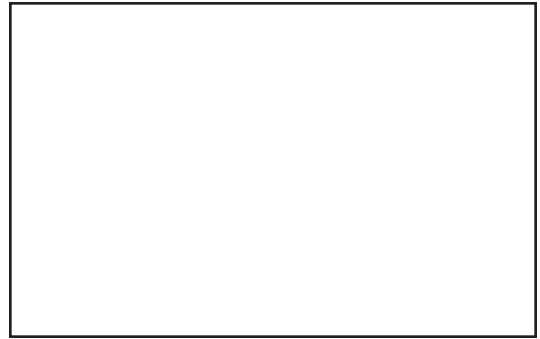

***Extension:** Write a script to use with the storyboard. The script gives specific information about what will appear on the screen. The setting (where the story takes place), the dialogue (what the characters say), where the characters stand, how they interact with each other, etc. should all be included.
